32mm ARCHITECTURAL GRIPPER

IDEAL WHERE GREATER HOLDING POWER IS NEEDED

Safe – Low formaldehyde plywood protects the installer's health and well being
Australian skill and expertise – Anchoring nails set to the right depth – never lose!
Australian skill and expertise – Setback pre-nails reduce chances of 'wall-strike'
Australian skill and expertise – Uniform pin heights – odd tips don't poke through
Strong – High tensile Kongo[®] pin nails never bend or 'stand up' during stretching
Strong – 5-ply plywood won't break during handling and nailing
Strong – Kongo[®] 'black' anchoring never shatter or break
Quality – Kiln dried 5-ply plywood avoids nail rust and timber bow
Quality – Original Kongo[®] Long-Point[®] pins and 'black' anchoring nails
Easy – Sharp Kongo[®] Long-Point[®] pins penetrate the toughest carpet backings
Easy – A third row of pins for easy anchoring of stiff carpet backings
Easy – Short-grain plywood for quick cutting and fitting to any space
Economical – No 'call-backs' on a quality Australian carpet gripper
Economical – Superior quality saves the installer time and money
Economical – Additional anchoring nails aren't required
Clever – Your choice of short, medium and long pin heights
Clever – Grippers for any installation, carpet backing or traffic area
Made to Standard – AS/NZS 2455.1 compliant in every way

84 lengths/box - 32mm Archi Standard
70 lengths/box 32mm Archi Wood
70 lengths/box 32mm Archi 2-Hit Concrete

9kg box weight

PRODUCT SPECIFICATIONS

Specialized[®]Archi contains original Kongo[®] Long-Tip[®] pin nails in 3 neat rows to penetrate and grip dense carpet backings. Hardened Kongo[®] 'black' anchoring nails secure this gripper to any subfloor without bending or breaking. Extra plywood width makes installation easier and provides extra strength when the carpet is fully stretched.
